VENATOR FOUNDERS FUND LP

May 2021

FUND OVERVIEW

Launched March 2006, Venator Founders Fund LP is a North American long/short equity mandate which strives to capitalize on exceptional investment opportunities in the capital markets. The Fund focuses on business fundamentals with a bottom-up strategy and a philosophy that great investment opportunities can make money in any market environment. Proprietary screening tools are utilized to uncover potential opportunities, which is then followed by a fundamental due diligence process, to help separate the truly great opportunities from those that just "look good on paper." The Fund's hedging methodology is designed to isolate company-specific 'characteristics' from market-related risks (such as market correlation, economic sensitivity and valuation risk).
