

FUND OVERVIEW

Launched June 2025, Venator Ascendant Alternative Fund is designed to provide long-term capital growth for unitholders utilizing a proprietary, rules based, quantitative model investing in a basket of stocks within the S&P 500 Index (the "Index"), which is a market-capitalization weighted index that is designed to represent the returns of large-capitalization U.S. stocks. The investment strategy will be focused on initiating positions in stocks predominately in the bottom half of the Index constituents as determined by market capitalization. The goal of this strategy is to offer investors increased exposure to potential leaders of the future and, in doing so, long term capital appreciation and outperforming the S&P 500 Total Return Index over the longer term. The Manager expects to invest in at least 200 companies within the S&P 500 Index.

DISCLAIMER

Commissions, trailing commissions, management fees and other expenses all may be associated with investing in any of the Venator Alternative Mutual Funds. Please read the prospectus and Fund Facts relating to each Alternative Mutual Fund before investing. The indicated rates of return of the Venator Alternative Mutual Funds are the historical annual compounded total returns, including changes in share or unit value and the reinvestment of all dividends or distributions, and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.
